

# **EXCLUSIVE BREAKING: Nurse Warns On Heinous Med Malpractice: Immediate Intubation & Remdesivir Kills C-19 Patients!!! - The True Defender !**

*Addison Wilson*

What you will read represents an in-depth interview with Nurse Helen Smith! It is comprised of her experience during the past year!

For twenty years, the nurse who worked in the intensive care unit shared that medical malpractice was responsible for high death numbers.

As the medical community adjusts to treating the artificially made virus, a Chi-com bioweapon, the end of the state of emergency will never end.

The government mandated the mRNA vaccines, and 80% of Americans have taken them only because of fear. The fear that the government is spreading across the population!

The coronavirus vaccines kill people, especially young adults, at an unprecedented rate and destroy natural immunity.

Helen Smith is a veteran nurse, traumatized from what she saw while working in intensive care during the pandemic. She was interviewed [by TGP](#), where she expressed her major concerns!!!

“I have been a nurse for almost 25 years. Most of my career has been in ICU. I have never seen anything like this in my whole career,” [Smith confessed](#). “They are not allowing doctors to do what they want to do to help the patients. Higher-ups in the hospitals are regulating everything.”

The veteran nurse described everything in detail, a litany of unorthodox, unhygienic, and dangerous practices implemented within medical facilities at the beginning of the bio war and worsened every month.

“They were dying because doctors were immediately intubating patients and providing them with Remdesivir, an expensive drug that does nothing to treat Covid or respiratory illness but shuts down the organs,” the nurse, who worked at Cleveland Clinic Indian River Hospital exclusively during Covid, recollected.

In the first wave of coronavirus, doctors didn’t obey the protocol typically administered to patients struggling with respiratory illness and were instructed to comply with regulations.

## **PATIENTS WERE DYING FROM LETHAL INTUBATION, NOT CORONAVIRUS**

“At the beginning, they weren’t even allowing them oxygen; they were just intubating them right away. At the time, they said they didn’t want to spread the Covid so they wouldn’t do high flow, or BIPAP or any other therapeutics, they just automatically got intubated with a breathing tube, a ventilator,” Smith added.

Adhering to the US Medical Association, CDC, and FDA directives, doctors started withholding HCQ and Ivermectin, medications that were effectively treating C-19 patients, and began applying Remdesivir, the medication that doesn't treat the virus and has terrible side effects.

“A major part of why people were dying from Covid is because they were putting people on Remdesivir and intubating them. The only drug they were giving people is Remdesivir – and we still are. Remdesivir costs \$5,000 a bag, and it doesn't do anything. It can shut your organs down. A lot of the covid patients treated with Remdesivir end up on dialysis,” she said. “Intubating patients is basically a death sentence, especially with the Delta variant; we save very few.

“At one point, we had a doctor giving patients Ivermectin because he was having such success in his outpatient clinic, and they came through. The management of the Cleveland Clinic, the higher-ups, threatened to fire him if he continued to do so. He's not confrontational; he just kind of goes along to get along. I will say, in his defense, that he will give it to the nurses if we get it.”

“We even plead with patients to stay calm – because they can't breathe, and they freak out and they end up on the ventilator. We beg them, ‘You don't want to go on the ventilator. We are not having good success.’ We even tell the patients that.”

### **DELTA VARIANT: THE TWILIGHT ZONE**

Thousands of Americans got the two doses of mRNA gene therapy, the first human trial of the drug that was previously tested on animals, but the delta variant of the virus spawned.

The intensive care unit faces a patients influx infected from Delta variant, and all of them got at least one dose of the vaccine. The ones on the frontlines were shocked to see what was happening and how people, one by one, were dying.

“This is what's weird. After the vaccines came out, so did the Delta variant,” Smith said. “I have never in my career have seen anything like it. We were losing five to six patients a day.”

“It was so bad, so crowded, that we were taking single rows in the ICU and doubling them with patients. In the ICU, I ‘heavy’ patients – sick, sick patients. It was almost like a MASH unit,” she continued. “Like being in a medic warzone because so many were dying. There were days we lost five patients, just in a 12-hour work shift.

Everybody is walking around going, ‘Are we in the twilight zone?’

“When the vaccines were first administered, you would not believe the number of strokes we got. The Cleveland Clinic is a stroke center, and I had never seen anything like it. I had two patients with drains in their brain to relieve the pressure, which is rare; you don't see that often. A lot of strokes – one who got MS – we had a bunch of different critically ill patients, and if you look at their medical records, they don't attribute their death to the vaccine they just got – they don't say it's from the vaccine.”

“All of a sudden, after the delta variant and they all died off, we have no covid patients right now. There are no covid patients in the ICU,” the nurse made clear. “As of the last 3 weeks, there are no Covid patients – that's why they are firing everybody now. We are getting really sick medical type patients – heart, lung. I read that a lot of hospitals are getting a spike of this kind of patient– with these severe, sudden medical issues. We are getting that as well.”

### **ENE THERAPY OR EUGENICS?**

“The vaccine doesn’t do anything to help you. It doesn’t. We think it caused the Delta variant. The nurses, among ourselves, we all talk. It got worse after the vaccine. It was hardcore. It was bad. A lot of people died. And I’m talking – we were losing 20-year-olds. The first Covid wave took the lives of older people with a lot of illnesses. The delta wave was mostly obese people, I will say that, but we lost people in their 20s, 30s, 40s, 50s – you name it.”

“A lot of young, really healthy people – they’re the ones that seem to be getting the heart issues. I have a nurse of child-bearing age that took it, and she had to get surgery because she was vaginally bleeding so bad after the shot.

“My own sister took the vaccine, and now she is anemic and having to go to the doctor and get iron and stuff all the time.”

Smith presented Dr. Robert Malone’s research, the banned inventor of the mRNA tech who constantly warned against the use of his experiment; she was mocked by her colleagues.

“After Dr. Malone, the inventor of the mRNA vaccines, came out warning about the deadly side-effects of BioNTech gene therapy and spike proteins, I tried to get everyone I know to listen, and they just looked at me like I was crazy. They just gave up on me,” she said.

“Actually, I’ve had a couple of nurses apologize to me because I was one of the first ones to find out about the fetal cells. They all apologized because they didn’t believe me at first.”

“What they are trying to do now is put them on what we call high flow oxygen, or we are putting them on a mask called BiPap,” Smith said. “If they then continue to defect, then we intubate them. So, we are at least giving them a chance before we intubate them now. When we were still using Hydroxychloroquine on our patients, we only lost two people a day from Covid. During the Delta wave, we had twice as many patients sick from the variant, and we only saved five a day. And we couldn’t use Hydroxychloroquine. Dealing with the delta variant was the worst thing I’ve ever seen.”

## **DEPOPULATIONGATE?**

Defectors of the MSM story have been subject to smear campaigns for shining light on the truth, but the fake news industry has doubled down on its attempt to manipulate the public with the pandemic.

“They are going to keep mandating the shots. The vaccine is weakening the immune system so much; they are going to be forced to get the shots to have an immune system,” Smith said. “It’s hard to tell how much one dose of an mRNA vaccine weakens immunity. They haven’t been around long – these have all been rushed through.

It’s not like taking a smallpox shot. That had 10 to 20 years of testing. This is a new technology, and it’s just being pushed out on us.”

“We’ve been bullied. We all know this virus came out of Wuhan. Even the doctors acknowledge that now. At first, they were all going along with it. The CDC and even the American Medical Association – these are people we really respected in my community – have lost all credibility. They’ve all gone rogue,” she argued. “The CDC and the FDA need to stop regulating everything and let the doctors do their job.

“The doctors complied and said they were administering Remdesivir because ‘That’s the Cleveland Clinic way.’ They told us it has no bad side effects. There was a point when the vaccine first came out that the doctors were bullying us by telling us they lost all respect for us and belittled us, saying, ‘I thought you were smarter than that.’

All but two doctors at the hospital I work in have been vaccinated. Now, they are all admitting it’s not working. Now they are saying it isn’t as effective as they believed it was

going to be.”

“They are trying to fire everyone at Cleveland Clinic. They won’t let anyone test out. I’d say a good 50 percent of nurses and doctors nationwide refuse to take the vaccine. I am working with a lot of nurses who are of childbearing age. They are scared to take it because they don’t know what it’s going to do with their reproductive health. There are some people that I work with at that hospital that were born in that hospital and they are working there and they are going to fire them,” Smith bemoaned. “We are just all refusing. We are not doing it.

“I am fixing to give up a 25-year career because I am being forced to take an injection I don’t want. I requested a religious exemption, and they refuse to give me one.” I am against this. It’s got fetal tissue in it and I want nothing to do with it. I recommend no one take this shot, I am from 25 years of medical. I am not going to take this experimental shot just because some old man out there is trying to make us. I am just not going to do it. I am not going to let the government way overreach. We are being taken over by fascists. We need to strike and shut the system down. They don’t realize that the people that are forcing this on us are keeping the system going. My last day of work is Thanksgiving weekend, the 29<sup>th</sup>.”

**APPENDIX C**  
**REQUEST FOR RELIGIOUS EXEMPTION AND ACCOMMODATION**  
**RELATED TO COVID-19 VACCINE POLICY**

To request an exemption and accommodation related to the COVID-19 Vaccine Policy based on your sincerely held religious observance, practice, or belief (referred to below as an "exemption" and "accommodation" based on your "religious belief"), please fill out this form and submit it to [COVID19RequestReligious@ccf.org](mailto:COVID19RequestReligious@ccf.org). After reviewing your completed form, Cleveland Clinic Indian River Hospital may follow up with additional questions before determining whether you are entitled to an exemption and whether a reasonable accommodation will be provided to allow for the exemption. If you have any questions as you fill out this form, please contact [COVID19RequestReligious@ccf.org](mailto:COVID19RequestReligious@ccf.org).

1. Please identify whether you are a Cleveland Clinic Indian River Hospital  
 Employee  
 Applicant  
 Student
2. Please describe the nature of your religious belief that conflicts with Cleveland Clinic Indian River Hospital's COVID-19 Vaccine Policy.
3. Would complying with the COVID-19 Vaccine Policy substantially burden your religious exercise? If so, please explain how.
4. How long have you held the religious belief underlying this request?
5. As an adult, have you received any vaccines against any other diseases (such as the flu, shingles, or tetanus)? If so, to the best of your recollection, please indicate what vaccine you most recently received and when you received it.
6. Do you have a religious objection to the use of all vaccines? If not, please explain why your
